

## Book Port™

Book Port™ is a flexible book reading device that consists of a small, portable unit with a keypad and earbuds, plus accompanying software. It features both text-to-speech capabilities and digital audio support. This means you may read electronic files (with synthetic speech) or digital recorded books (with human speech).

The unit contains state-of-the-art hardware such as a universal serial bus (USB) connector and a CompactFlash® card slot for removable mass storage. Book Port also acts as a recorder, letting you take audio notes on the material you read.

The included software and cable lets you use your PC to transfer material to Book Port. You can then disconnect Book Port and take it anywhere you go.

### What Can I Read on Book Port?

Thousands of public domain electronic books are available free over the Internet. More recent electronic books are available for purchase over the Internet.

Two popular sources are [bookshare.org](http://bookshare.org) and NLS Web Braille at [www.loc.gov/nls](http://www.loc.gov/nls). In addition, if you have a scanner and optical character recognition (OCR)

software, you can scan your own books or other material, load them onto Book Port, then read them anywhere! Note that you must follow applicable copyright laws when scanning material into your computer.

APH's Book Port now supports files from [audible.com](http://audible.com). Audible.com is one of the largest suppliers of recorded audio material in electronic format, and you can now play these files on Book Port. Even more interestingly, Book Port Transfer, the software that runs on your PC, now supports the ability to compress time from audio files including those from [audible.com](http://audible.com). This is the world's only method for listening to [audible.com](http://audible.com) files at a rate faster than the original recording speed.

Features:

- Read DAISY Digital Talking Books
- Read contracted braille in Braille Ready Files
- Play MP3s in stereo
- Send web pages directly to Book Port from Internet Explorer (R)
- Record audio memos
- Navigate among files or within a book
- Navigate by letter, word, sentence, paragraph, page, or section items (for audio files, Book Port navigates by finding pauses in narration)
- Control pitch, speed, and volume of speech
- Choice of synthetic speech voices
- Hear the file name, size, current position (as a percentage), page number, and the last modified date
- Add text to the search memory, then find every occurrence of that text in the file
- Delete files or lock to prevent deletion
- Sleep timer turns unit off after a set amount of time
- Lock keys so you can put it in your pocket or purse

Recent Upgrades:

- Supports note taking capabilities using the braille keyboard
- Note synchronization with files on your PC
- Support for Spanish language files
- Additional features and documentation that make listening to podcasts easier

Includes:

- Book Port unit with built-in keypad, earphone/bud jack, and microphone
- Earbuds
- One CompactFlash card
- USB cable for connecting to your PC
- CD-ROM with Book Port software, electronic manual, and over 1700 e-books
- Two AA batteries (enough for 60 hours of continuous use!)
- One year warranty
